1. The terminal disclaimer filed on 02/09/2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US patent 6,265,140 has been reviewed and is accepted. The terminal disclaimer has been recorded.
2. The following is an examiner's statement of reasons for allowance: The examiner notes that the use of two photon absorption results in a point within the silver halide emulsion being exposed, rather than a column/cylinder which results from the traditional single photon exposure and allows the placement of data at points within the volume of the film without writing data on the surface of the photosensitive layer. The use of two lasers with the same optical recording media, chosen such that a two photon exposure processes results, together with the other steps render the process novel and unobvious. Conventionally different layers of silver halide would be differently sensitized so overlapped beams would not both expose the same layer and a two photon exposure would not occur. Also the use of two lasers is less desirable, when one with the beam split into two might be sufficient (where the lasers are the same wavelength).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Allan Fanucci (30,256) on March 15, 2005.

The application has been amended as follows:

In claim 60, at line 12, before "writing data" please insert - - where said exposing is- - In

In claim 60, at line 12, before "a two-laser" please insert - - using- - .
